

Ali Imran

Junior React Developer With Practical E-commerce Project Experience

I'm a Junior React Developer with hands-on experience building e-commerce sites and creating tools like a weather detector and investment collector. I love making websites that are easy to use and am excited to learn and grow with a new team.

EDUCATION

BSCS

Virtual University

Faisalabad

Courses

- Enrolled in a Graduation's program in Computer Science

WORK EXPERIENCE

Frontend Internee TechTrack

05/2023 - 08/2023

Faisalabad

Achievements/Tasks

- Worked on building websites using HTML, CSS, JavaScript, and React.
- Created projects like clones of Instagram, Facebook, and YouTube, which helped me get hands-on experience with frontend development.
- Learn React to make interactive and user-friendly websites that look great and work smoothly.
- Learned a lot about web design and development, focusing on making websites both functional and visually appealing.

SKILLS

CSS

Bootstrap

JS

React Js

PERSONAL PROJECTS

MindLeap (<http://mindleap.42web.io/>)

- Developed MindLeap, a React-based app designed to help users schedule appointments with doctors for mental health support.
- Focused on creating a user-friendly and accessible interface that makes it easy for users to book appointments and manage their mental health.
- Used React to build an interactive and responsive frontend, ensuring a smooth and engaging experience for users.
- Gained experience in frontend development by working on a project with a real-world application.

ShopCart (<http://shopcart.42web.io/>)

- Built an eCommerce website using React to provide a complete shopping experience
- Designed and developed various features like product listings, dynamic product details, and purchase options.
- Implemented interactive elements such as image slideshows, size and color selectors, and coupon fields.
- Created a smooth checkout process with functionality for applying discounts, handling cart updates, and managing user reviews
- Integrated Firebase for user authentication and social login options, allowing users to sign up and log in securely.
- Ensured a responsive and user-friendly layout, including product displays, shopping cart management, and a contact page with Google Maps.
